

Application of Aldara Cream

- Make small opening in the packet
- Gently apply small amount (half pea-size) on a q-tip or toothpick
- Apply to the affected area once daily for 2-4 weeks, or until area red and inflamed.
- Paperclip or scotch tape packet closed and store in a zip-lock bag. May reuse until packet is empty.
- Wash hands after handling medication

Once affected area is red, inflamed with a possible scab, stop medication and let heal. Ok to apply antibiotic ointment (polysporin or bacitracin) during healing time.

Please call office if you develop pain in the area
