Lisa Stirling, MD

Kaci Orosco, PA-C

### BIOPSY CARE INSTRUCTIONS

Keep the Band-Aid on until later tonight or tomorrow.

After the first 24 hours, the Band-Aid is optional.

Wash the area twice daily with soap and water. Continue this daily until healed (1-2 weeks)

You may apply aquaphor, vaseline or polysporin daily. Please avoid neomycin/neosporin.

Please call us if you are concerned about infection (increasing pain, redness or fever).

Your biopsy results will be sent to an outside pathology lab. A separate bill will be generated from the pathology lab. Most specimens are processed by Compass Dermatopathology.

[www.compassdermpathology.com](http://www.compassdermpathology.com) ph: 858-750-2983.

Biopsy results are usually available 2-3 weeks after the date of the biopsy. If you have not received your results by this time, please call us.

If you would like us to leave your biopsy results on your voicemail or with a family member, please complete the release form.
